

The activity that CHEMICALS & AROMAS EUROPE, SL considers in accordance and compliance with the quality standards demanded by the International regulation ISO 9001:2015 and EFFCI GMP is:

DESIGNING AND PRODUCTION OF AROMATIC COMPOSITIONS AND FRAGRANCES

The declaration of policy gathers the following key principles:

1. Commitment to meet explicit and implicit requirements, demands and expectations from our customers, as well as to comply with all legal and regulatory frames and apply GMP standards for all our cosmetic ingredients.
2. Spread the objectives, quality and GMP criteria at all levels of our corporative structure.
3. Set up the objectives and indicators of quality and GMP, as well as accomplish the rigorous follow up of our progress in all sectors, so we are able to always understand and ensure the product and the quality levels that our clients are looking for.
4. Ensure that the working conditions are optimal through continuous hazards evaluation in all processes, removing these hazards totally when possible and reducing the unavoidable ones to minimum levels.
5. Develop our continuous formation programs which aim for the best possible qualification of our employees, involving all workforces in all the stages of all the objectives in this document.
6. Consolidate the continuous improvement process in the performance of all the company activities.
7. Encourage and achieve a motivating environment for all the company members.

The management makes this policy accessible and makes it available to their clients, all their employees, suppliers and for the general public.

For Chemarome, the inclusion of GMP in its quality system is of vital importance. Our management has always established a corporative emphasis to satisfy the requirements of GMP for cosmetic ingredients.

The policy stays up to date by the means of periodic reviews, agreeing with the system revisions by the management, taking into account the changes in the environment conditions and the information gathered by study and practice of the industry. In that sense, the management provides all human, technical and economic means needed to accomplish the objectives and goals, in a scheduled and periodic way.

The company Management.
